

PLATFORM STEP LIFT M SERIES

LEVEL

Easy-to-install compact platform lift solution

www.levellifts.co.uk

THE M SERIES

Introducing two innovative step lift solutions designed to overcome level changes with style and efficiency within both domestic and commercial environments. Maximum travel height 1.75 metres.

Tech Lift M4

The perfect balance of simplicity and modern design. Featuring a standard through-access configuration, the M4 is available in three platform sizes to accommodate the smallest of spaces.

Tech Lift M5

Innovation meets accessibility with side access doors positioned at 90° to each other. The generous 1100mm x 1650mm platform delivers exceptional manoeuvrability with 1020mm clear door openings at each landing - ideal for wheelchair users requiring additional turning space.

VERSATILE AND EFFORTLESS INSTALLATION

The Tech Lift M4 and M5 models are engineered for indoor and outdoor use, including chlorine and marine environments (IP65 rated).

Installation is typically completed in a day with no structural modifications or additional building work required. Floor-mounted fixed ramp (no need for a pit). Can be relocated.

SPACE-SAVING DESIGN

The intelligent lifting mechanism, which consists of four robust telescopic legs, requires minimal floor space, making the M Series step lifts ideal for tight spaces.

ARCHITECTURAL CLEAN LINES

The M Series comes with seamless fully glazed doors as standard or can be made with Plexiglass vision panels (smoked or clear) for more industrial environments.

MULTIPLE STANDARD FEATURES

Aluminium platform flooring with anti-slip strips. Upper and lower gates included with or without mid-rail. Wireless wall-mounted call station (2 buttons) – 'call & send'.

TECH LIFT M4

FEATURES

CLEAN AND FUNCTIONAL DESIGN

Sleek glass panel doors deliver a refined, modern aesthetic that blends in with traditional and contemporary settings.

FLEXIBLE DESIGN

Available in three platform sizes. Ultra-slim step lift due to telescopic lifting legs. Designed to fit narrow and tight spaces.

INSTALLATION AND AFTERCARE

WE HAVE IT COVERED

THE INSTALLATION PROCESS

Level Access Lifts has over 20 years of experience in surveying, installing, and maintaining platform step lifts: we are proud of our reputation as the market leader in this sector. Our customers are often surprised at how easy the whole process is and regularly recommend us to their friends or colleagues.

We work closely with our customers to ensure a seamless service. Our M Series step lifts range is manufactured in Sweden and will be delivered to our technicians to install within a six-to-eight-week period. Installation takes between one and two days.

PEACE-OF-MIND WARRANTY

We provide 3 years* parts & labour warranty including two service visits in the first year.

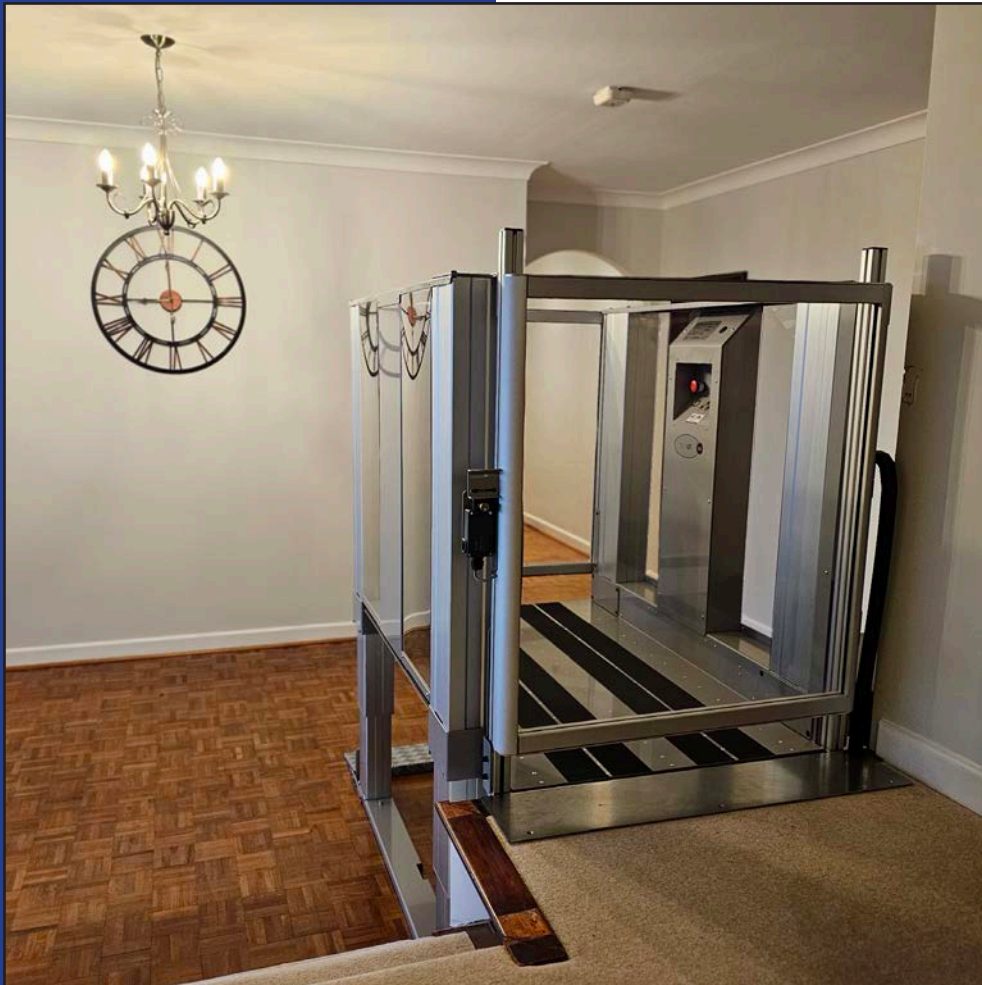

SERVICING YOUR STEP LIFT

For a competitive annual fee, we will continue to provide the same level of service that you have become used to, from our Factory Certified Technicians.

* Subject to the uptake of a maintenance contract with LAL for years two and three. The warranty period shall revert to 12 months if no maintenance agreement is in place.
